

**FX** *airguns* MADE IN SWEDEN

## MADE IN SWEDEN

FX Airguns was founded by Fredrik Axelsson in the small picturesque town of Mariestad, Sweden in 1999. As a passionate airgun enthusiast, he was constantly on the look for the best airgun available. When Fredrik didn't find what he was looking for, he started on the journey to create the airgun of his dreams. Two decades later, he has more than succeeded.

The highly skilled FX team (with Fredrik at its helm) has since its small beginnings, relentlessly introduced cutting edge technologies that has propelled the airgun industry into a new era where FX Airguns are globally considered an industry leader. As intricate as their guns are, the philosophy behind their creations is quite simple: to provide the most exceptional airgun in every possible way, and so, they have.

FX Airguns are lovingly handcrafted by a team of over 50 Swedish craftsmen and engineers that have honed their skills to perfection; and airgun lovers worldwide have

rightfully come to expect much from them. An FX Airgun won't leave the factory until it has been thoroughly tested in all aspects of its masterfully engineered capacities. FX Airguns provide superior accuracy, dependable consistency, as well as being remarkably quiet, efficient and extremely powerful. Inevitably, FX Airguns are known for outperforming their competition with ease.

Their merit list is long. FX Airguns have been a trailblazer for the airgun industry since its inception. They have more patents, unique innovations and are more technologically advanced than any other airgun manufacturer existing today.

The backbone of FX Airguns has always been and will always be their deep passion for the airgun sport and their drive to outperform yesterday. With new technology always pushing the limits of what is possible, who knows what incredible airguns are yet to be invented, in the cradle of the minds from Mariestad.

## THE DREAMLINE

With the arrival of the FX Dreamline, innovation that was previously only dreamed about, is now a reality. The FX Dreamline is the first fully modular airgun system in the world. The modular design allows the rifle to change to any of the Dreamline configurations. Today's hunting bullpup can be converted for the weekend field target match. The classic sporter rifle can be switched out to house all your favorite AR furniture and accessories. Whatever you can imagine is possible with the FX Dreamline.

The beauty of the FX Dreamline starts with the revolutionary world class FX Smooth Twist X barrel (STX). This is the same barrel housing and liner system as found on other elite rifles such as the FX Impact, FX Crown and FX Wildcat. The STX barrel allows the Dreamline the unique ability of changing both the caliber of the gun as well as the inner liner of the barrel to allow for different twist rates and other bore specifications. This provides a tailored barrel to meet the vast array of projectiles available today.

The Dreamline also includes the new AMP Regulator (Adjustable Match Precision Regulator). This robust regulator is revolutionary in that it can be adjusted externally either to higher

or lower pressures without the need to remove pressure from the gun. The AMP regulator also uses the latest in high performance parts to provide precision accuracy that holds up over time.

The FX Dreamline features the same adjustability as found on other premium FX rifles. All adjustments can be fine tuned including valve flow, hammer tension, and regulator pressure. These adjustments are done quickly and easily allowing the shooter find harmonic balance and maximize the performance and accuracy of the Dreamline.

All FX Dreamline models utilize a large capacity rotary magazine. This is the same magazine used in the FX Crown and is indexed with the smooth cocking side lever. This newly designed side lever takes the ease of cocking a rifle to a whole new level as it is nearly effortless to cock.

Most Dreamline models offer a standard 220 cc cylinder filled up to 230 BAR, but there are also bottle versions of many of the configurations which will allow for more air and higher shot counts. 1/2" UNF threads on the barrel allow for the optional addition of a moderator. The FX Dreamline also features the world-famous FX match grade trigger, set at 15 ounces from the factory.

*The Dreamline Classic Laminate Black Pepper*

## THE DREAMLINE CLASSIC

The FX Dreamline Classic is the natural evolution of the FX Streamline. FX has taken the proven Streamline platform and added world class features that take it to the next level; bridging the gap to rifles such as the FX Crown and FX Impact.

*The Dreamline Lite*

# THE DREAMLINE LITE

The FX Dreamline Lite is a new look model unlike other FX rifles from the past. Weighing in at 5 1/2 pounds, this Dreamline lives up to its name of being ultra-light weight. It is also the most customizable of all the Dreamline models. The compact version provides an ultra-packed airgun into a very small package without removing any of the features of the standard Dreamline. Perfect for throwing in a backpack or having ready for that spur of the moment hunting opportunity.

The Crown Laminate Forest Green

## THE CROWN

Embodying every technical advancement FX has conceived to date, the brand-new FX Crown is quite simply Airgun Royalty.

With a ground-breaking new barrel system that has left the airgun world speechless and gun manufacturers everywhere in a state of shock, the FX Crown is the most progressively engineered and accurate air rifle ever created. Period.

After receiving such critical acclaim to the superior features of the earlier FX Impact, the FX engineers knew that many would desire these same features in a more traditionally designed hunting rifle. Enter, the Crown. The newly announced FX Crown is extraordinary; not just for incorporating a plethora of adjustments and fine-tuning options, but also for ushering in the advancement of the FX Smooth Twist X Barrel and Interchangeable Barrel Liner System. The Smooth Twist X Barrel is a fully rifled barrel using the proprietary system of imparting the inner rifling of the barrel from the outside of the steel tubing, all housed as an interchangeable barrel liner that allows for changing of barrel twist rates, and other bore specifications which allow for a wider array of projectile use.

With the Crown, the same adjustability features previously

found on the FX Impact are retained. You can fine tune the hammer tension via an accessible power wheel adjuster, externally adjust the air regulator as well as adjusting the air flow. With these cutting-edge features, the Crown provides countless degrees of fine tuning to suit your individual needs and to maximize your air rifle to its optimal performance.

Other features include an adjustable match grade trigger, 480 cc light weight carbon fiber air bottle, telescoping moderator, large capacity magazine, and an extremely smooth side cocking lever. The lever itself is so accurately placed and so perfectly engineered that it allows for the shooter to cycle and cock the gun without ever needing to pull their eye from their scope. This all-in-one rifle also allows for the quick change of any of its four available calibers (.177, .22, .25 or .30) by acquiring additionally available barrel kits.

Having already claimed its first competition victory (it was the winning rifle used in the annual 2017 "Extreme Benchrest" competition), the FX Crown is the next generation of airguns and will easily maintain the Royal Gold Standard of KING of all air rifles.

*The Impact MKII Black*

*Fully regulated with possibilities to change caliber swiftly. Four plicainny rails for easy adapt of accessories. Available in two colors, Standard Black or Silver Edition.*

*The Impact MKII Silver*

## THE IMPACT MKII

Every so often there are leaps forward in technology that forever change our perception of what is possible. The FX Impact is such a phenomenon and has permanently pushed forward the boundaries of what to expect from an air rifle.

This all-in-one air rifle has been engineered to satisfy the most demanding airgun shooter with high-performance features. The Impact is completely adjustable: air valve control, hammer spring tension, and even regular adjustments can be made externally to allow for various shooting scenarios.

The Impact now incorporates the new FX Smooth Twist X Barrel which is a fully rifled barrel liner. FX's proprietary process of imparting the inner rifling of the barrel from the outside of the steel tubing, is an outstanding upgrade in airgun accuracy. This Smooth Twist X Barrel is housed in the Interchangeable Barrel Liner System allowing the shooter

to swap and change barrel liners of various twist rates, bore specifications and more; all to tailor the barrel to different projectile sizes. The breech and barrel assembly also incorporate a quick-change system that allows for any of the four calibers (.177, .22, .25 or .30) to be used. All that is required is an extra barrel and pellet probe for each caliber.

Other notable features of this bullpup include a unique match grade trigger system that does not rely on connection rods or linkages. The smooth side cocking lever is placed perfectly above the trigger to allow for the quickest possible follow-up shot. This high powered and tactical, yet lightweight and compact airgun is a sensational piece of cutting-edge technology. With all these features wrapped into one rifle, the FX Impact will continue to be the benchmark for air rifles worldwide.

*Comes delivered in a compact hard case with room for two barrels, pellet probes, spare magazines and ammunition. And there is also plenty of room for optics.*

Setting new standards to Bullpup systems. Extremely light and well balanced with the side-lever positioned near the grip. Regulated to ensure best possible consistency.

*The Wildcat MKII Laminate Black Pepper*

## THE WILDCAT MKII

The FX Wildcat may be the perfect compact airgun. Beautifully balanced, light weight, smooth cocking, and featuring a trigger that would be exceptional on any rifle, let alone a bullpup. The original Wildcat upon its debut in 2015, quickly became a top selling airgun the world over. Now in 2018 FX's engineers have brought us the Wildcat MKII.

The MKII builds upon the groundbreaking Wildcat, adding the all new FX Interchangeable Barrel Liner System. This is the system that allows users the ability to exchange barrel liners, and if desired upgrade the FX Smooth Twist barrel liner that comes standard with the MKII, to an upgraded FX Smooth Twist X Barrel. The X Barrel liner is a fully rifled smooth twist barrel, available in varying twist rates and bore specifications that tailor to the vast array of airgun projectile weights and shapes.

This new barrel system lends to a Wildcat that is now

much lighter in hand. Other upgrades include an upgraded reloading mechanism, trigger, and updated airflow that obtains better consistency and shot count.

The rest of the original Wildcat stays perfectly undisturbed. Features include the highly accurate internal air regulator, easy load magazine system, finger print resistant finish on all high-grade aluminum parts, and a fully shrouded barrel. The cocking lever has been perfected to be the smoothest operating sidelever possible with only the highest quality materials used. Forward placement of the lever provides quick and soft cocking of the gun with only the slightest of hand movement away from the trigger.

The Wildcat MKII enhancements continues to solidify its status as the perfectly designed and executed bullpup featuring all the performance and accuracy that has established FX Airguns as the finest airgun manufacturer in the world.

Solid bullpup action, available in calibers - 177, 22, 25 and .30 making it possible to take on all possible missions. Regulated to assure best possible consistency.

## THE BOBCAT MKII

In 2012, FX developed and brought into production the Bobcat air rifle. The design team looked at the current markets bullpup offerings and found most cocking systems hard and uncomfortable to use. In typical FX tradition, they were eager to push the envelope and create more functional and exciting solutions and so the Bobcat was born.

The Bobcat is a hybrid that sports the best of two action designs. Short and quick to handle as a bullpup and easy to use with high power and accuracy as a full-length rifle.

The overwhelming success of the Bobcat has inspired FX to improve on this fine shooting platform. Enter the Bobcat MKII. This new version comes standard with a competition grade regulator, and a dual pressure gauge system that reads regulator and air supply pressures.

The probe filling port has an integrated twist-open dust cover that protects the inlet valve from debris. Also new on the MKII is a cocking lever in billet aluminum. Internal improvements have also been made to increase the reliability of the rifle.

The famous match winning Smooth Twist Barrel is fitted to a single piece breech block that houses a valve and power adjusting system which provides very consistent velocity and one of the highest shot count per air volume in the industry. The Bobcat MKII provides high power, match winning accuracy with quiet operation nestled in a synthetic soft touch stock for maximum comfort in all weather conditions. The Bobcat MKII will set the standard for high precision air rifles and will not disappoint the most demanding airgun shooter.

The Boss Laminate Black Pepper

The Boss Synthetic

The Boss Walnut

## THE BOSS

“Revolutionary” is the only word that describes the FX Boss and the development of this rifle. With a custom made .30 caliber Smooth Twist barrel, the Boss has quickly proven itself in competition and in the field. The FX Boss has been designed for heavy duty, long range field work with a power output of 75 plus ft/lbs and 48 shots per fill from the regulated action. The Boss comes with a magazine that holds nine .30 caliber pellets and can also be used as a single shot. With tested accuracy of 1/2 inch at

75 yards, the Boss is deadly on coyote or small deer. The walnut thumbhole stock sports very nice grain and the synthetic option has a nice all weather soft touch coating.

The FX Boss is light in weight, easy to handle, and quiet in report. The two-stage adjustable match-grade trigger gives precise control over the shot for the most in accuracy. With the power and performance provided, the FX Boss lives up to its name.

The Royale 400 Laminate Black Pepper

The Royale 400 Synthetic

The Royale 400 Walnut

## THE ROYALE 400

This gun is without a doubt, an FX flagship! FX spent two years in developing and testing the Royale breach block and valve system before it was put into production. Incorporated into the breach block is a super smooth and effortless side lever, cocking system and spring tensioned magazine. Adjustable match-grade trigger for crisp, precise release of the shot and a 3-step patented power adjuster, allows for super-fast

selection of the required power level. The power adjuster will also repeat itself with absolute precision. The 400 cc air supply provides many super accurate shots from the Smooth Twist barrel. The Royale 400 is a lightweight super gun, quiet in report with the included suppression system. A regulator also comes standard which will give more consistent shots per fill. Completely recoil free.

The Royale 500 Laminate Black Pepper

The Royale 500 Synthetic

The Royale 500 Walnut

## THE ROYALE 500

The Royale 500 sports all the features of the 400-series rifle with a few exceptions. The 500 is a .25 caliber with a longer smooth twist match grade barrel as well as a larger 500 cc air cylinder to provide maximum performance. The 500 comes standard with the patented power adjuster with repeatable power settings as well as internally regulated. Available in

synthetic with soft-touch surface, a luxurious walnut stock or a black pepper laminate stock. The 500 is much lighter than it appears and can be carried in the field for extended periods of time. Very high powered and recoil free, the Royale 500 is the best choice for larger pest and long-range shooting.

Above picture shows a Verminator in fullsize edition. Available in calibre .177, .22, .25, .30.

Comes delivered in a compact hard case with room for optics, ammunition, magazine and silencer.

## THE VERMINATOR MK II

The Verminator MKII is the premier, small, takedown style rifle that is packed with high quality features. The award-winning Royale breech block is the foundation for this high-performance tack driver. With a 400-cc air cylinder and super-efficient valve system, the Verminator MKII does not disappoint. It boasts a large shot-count, three-step power adjuster, match grade barrel and an adjustable trigger. The synthetic stock is both

purpose-built and adjustable for length of pull and face position. Comes in dark-grey metallic with soft-touch surface. The multi-shot magazine combined with a super smooth side lever cocking action and gives fast follow up shots. The barrel is fully shrouded for super quiet report and choked for match accuracy. The rifle comes in a fitted case with room for additional accessories. Recoil free. Also available as full-size edition with long barrel.

*Delivered in a compact hard case that includes airgun-barrel, arrowbarrel, arrows, magazine and dual optics. There is also room for silencer and ammunition.*

# THE VERMINATOR EXTREME

The FX Verminator Extreme is the ultimate in compact airgun versatility. We have taken into consideration all possible airgun applications and have included the necessary kit to handle any scenario with the Verminator. Upon opening the included hard case, you will find the Verminator MKII rifle and FX scope mounted with quick change mounts. Further investigation will reveal a full length barrel for high power applications as well as a shroud extension for super quiet report. We have also included a special barrel that will shoot arrows for added fun for small to medium size game. Switching barrels is quick and easy and requires no tools. Included in the case are four target arrows and crossbow-optic with quick change mounts. Available in synthetic stock in dark-grey metallic with soft-touch surface.

## THE BIATHLON MKII

The FX Blathlon MKII rifle is built in the spirit of the Olympic competition rimfire guns. This MKII version has been updated and rebuilt around the world class FX Smooth Twist X barrel system. The Smooth Twist X rifled barrel chambered in .177 caliber, provides consistent high-level accuracy that will stand up against any match barrel available. The rifle comes with a straight pull biathlon bolt that is indexing, using the distinctive thumb and forefinger method. This cycles a rotary magazine or

shooters can use an optional 5 shot straight magazine, made to match the rounds available in biathlon competitions. Other features include the fully adjustable synthetic stock, fully adjustable match grade trigger, AMP regulator (adjustable match precision regulator), harness and sling rails, and a front globe and diopter sight option. The FX Blathlon MKII is a unique rifle perfectly suited for training and competition use in biathlon, 10 meter, and other similar disciplines.

<b>Cocking system</b>	Sidelever, straight pull with thumb return.	<b>Calibre*</b>	4.5 (.177)	<b>Energy</b>	4.5 (.177): 24 J • 18 ft/lbs

## THE RANCHERO ARROW

The FX Ranchero Arrow is the premier, repeating pre-charged arrow pistol on the market. It sports a synthetic stock with soft touch panels that provide the ultimate in comfort for all weather conditions.

The action has been moved rearward in the stock for better balance and control, and a new side lever handle gives better

grip for ease of use. The patented 3-step Power adjuster has clear markings for low, medium and high settings and a scope rail is standard. The adjustable trigger unit help to give this pistol the accuracy and power FX is famous for. Plastic carrying case is included. The Ranchero is the leader in high power recoil free arrow pistol performance.

<b>Cocking system</b>	Sidelever	<b>Optics</b>	11 mm dovetail scope mount	<b>Air capacity</b>	65 cc

 Vertically adjustable 3,8 mm 4 mm at 100 m shooting distance.  
 Eliminates all problem with limits of crosshair movement for long range shooting. Always lets you use the sweet spot of your scope and fine tune with crosshairs. Easy to use and affordable!  
 Available for 1" and 30 mm scope tubes.

# ACCESSORIES

*Produced in great numbers since 1999.*  
 - The best way to get independent.  
 - High Quality.  
 - Reliable.  
 - Maintenance free moisture trap.  
 - Multiple variations.  
 - Usable for PCP, Soft Airguns, Paintball and others.

**Four stage turbopump**  
 The new turbopump is equipped with a patented 4 stage system. It has a unique gearing system that gives you the opportunity to gear down when it gets rough. It allows the user to choose if they want high volume (300 cc) with lower pressure. Or low volume (200 cc) with higher pressure.  
**Features:** Pressure gauge, moisture trap, particle filter (replaceable), and bleed valve. Unique gearing system.  
**Connections:** DIN or Kevlar hose 0,5 m with 1/8" thread.

### Three stage pump

The easiest most convenient and affordable way to charge your airguns patented three way system gives you 200 bar with ease. Maximum fill pressure 250 bar.

**Features:** Pressure gauge, moisture trap, particle filter (replaceable), and bleed valve.  
**Connections:** DIN or Kevlar hose 0,5 m with 1/8" thread.

### Charging Kit

Complete charging device for your scuba tank.  
**Features:** Pressure gauge, particle filter (replaceable), and bleed valve.

**Connections:** Kevlar hose 0,5 m with 1/8" thread and FX Filprobe. DIN in scuba end. Also available with Stainless quick connection.

### Quick Disconnect Fill Probe

For easy swap between later model of quick charging connector and early model connector. Made of hardened steel.

### Pump accessories

Various adapters DIN to 1/8". External moisture trap, easy to service and clean, 1/8" connections.

# ACCESSORIES

**Picatinny rail**  
Swap the standard rail to this on your Wildcat to be able to use picatinny mounts.

**Addition**  
Shrouded barrel with barrelsupport available for Typhoon, T12 and Cyclone.

**Cleaning pellets**  
Recommended for all FX guns. Outstanding cleaning without damage to the barrel. Available in 4,5 (177), 5,5 (22) and 6,35 (25).

**Magazines**  
8 shot magazines available in 4,5 (177) and 5,5 (22)  
9 shot magazine for 7,62 (30)  
11 shot magazine for 6,35 (25)  
12 shot magazine for 5,5 (22)  
16 shot magazine for 4,5 (177)  
New made in high grade aluminum.

**FX pellets**  
High performance domed (round tip) air rifle pellets.  
Calibre: 7,62 (.30) weight 3g (48,30grains).  
Calibre: 7,62 (.30) weight 3,25g (50,15grains).  
Calibre: 6,35 (.25) weight 1,645 g (25,4 grains).  
Calibre: 5,52 (.22) weight 1,030 g (16 grains).  
Calibre: 4,52 (177) weight 0,547 g.

**Plastic rifle case**  
Available in various dimensions.  
500 x 300 x 85 mm  
820 x 295 x 85 mm  
900 x 305 x 100 mm

**Gauge assembly**  
This gauge suits all our front air tubes.  
You can use it with or without barrel support.

**Barrel support**  
Requires newer version air cylinder with raised section on end cap. Available for standard (14 mm) barrel and shrouded versions (16 mm). Replacement end cap is required if an older version of cylinder. Is to be used with barrel support.

**Pellet tray**  
Singleshot pellet tray suits all FX rifles with springtensioned magazines.  
Available in .177 .22 .25 .30

**Muzzle flip**  
Suits all FX rifles with 1/2" thread on the muzzle. Mounted as standard on the Verminator.

**Tube extension**  
Add this to your existing air tube for additional volume. Approximately 5 - 10 more shots at high power. 45 cc - 100 mm.

**Tube clamp**  
Allows easy addition of a sling, strap, bipod or other accessory without any modification to the fore end of the stock. Suitable for all air tubes with a diameter of 33 mm.
